### Order example of pressure sensor

Pressure sensor of P series, intended for pressure conversion from 0 to 0,4 MPa, for operation within temperature range from - 40 to + 100 °C, with "closed bridge" circuit, flush diaphragm, DC voltage power supply, diameter of the conjoint part 17 mm and flexible wire 80 mm length:

Pressure sensor P 0,4-101-V-D17-L.

Note: if wished, the wire length (standard 80 mm) can be changed, in this case the required length should be added to the wire code L, for example:

Pressure sensor P 0,4-101-V-D17-L120.

## 11 Marking

Marking on the sensor body must contain following information: series, upper gauge pressure limit in MPa, version of the operating temperature range, circuit type, version of the diaphragm, power supply modification, conjoint part code and order number
